PAGE	1 OF 1

BEEAH a state-of-the-art waste management company is committed to play its role in providing technologically advanced and innovative solutions in reusing, recycling, recovering, treating, and disposing the hazardous/non-hazardous wastes including but not limited to (residential waste, commercial waste, industrial waste, agriculture waste, animal waste, construction waste, marine waste) in the form of solid or liquid produced in the Sharjah state.

Our mission is to pioneer sustainable quality of life by providing a framework for zero-waste strategies, while ensuring proper resource management and quality of resources like air and water

To maintain quality performance of all business units at the highest level, BEEAH is committed to

- **Organizational Strategic Alignment**

Recycling leadership will establish, unify, and commit to the purpose and direction of the organization. All aspects of work in the company will be observed to ensure effective and efficient use of resources in achieving desired results.

Establish quality objectives at strategic and operational levels within the company, that will be measured, monitored, and reviewed annually. Maintain documented information as quality objective's evidence to demonstrate compliance with the Quality Management System.

- **Compliance**

Recycling will conduct its business in a manner consistent to the core principles of Quality Management System where appropriate policies, processes & procedures are compliant to the requirements of BS EN ISO 9001:2015 standard.

We will comply with all relevant statutory obligations, legal requirements, regulatory requirements, standards, specifications, and codes of practice which we have subscribe into and any applicable requirements.

- **Products & Processes**

Continual Improvement will be a permanent objective of the organization to achieve perfection in what we do by implementing appropriate risks and opportunities associated with internal / external issues and meeting the needs and expectations of interested parties.

- **People**

At Recycling, our people are at the forefront of our priorities. Training and development programs are designed to develop and motivate employees towards achieving company's policies, goals, and objectives. All personnel at all levels will be involved in development and implementation of Quality Management System to ensure its effectiveness. Key roles in maintaining the quality of company processes and products will be appropriately identified and delegated.

- **Innovation**

Innovation is deeply ingrained in our corporate culture and has been a driving force in reusing, recycling, recovering, treating, and disposing various categories of wastes.

- **Technology & Automation**

Recycling strives on finding smart solutions for integrated waste management and makes use of cutting-edge technology using eco-friendly and automated processes for optimum performance of waste reusing, recycling, treating, and disposing.

All facilities and processes within BEEAH – Recycling will be reviewed periodically to ensure that they remain effective in meeting regulatory compliance and client satisfaction. Improvement made on this policy because of new technology, processes and enhances organization capabilities shall be effectively communicated to all employees to ensure the adherence and commitment which are important in achieving quality objectives of Recycling. The policy will be made available to interested parties upon request.
